Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1772

1. Applicant's arguments with respect to claims 11-29 have been considered but are moot in view of the new ground(s) of rejection.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 11-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marchal (GB: 2,063,710).

Marchal relates to a double-sided, self-adhesive sheet comprising a backing layer of synthetic material (page 2, col. 2, lines 116-119) and the adhesive are tacky with one side adhesive having a strength different from the other side adhesive. As shown in the drawings, the second adhesive is planar. Also, because the adhesive is tacky and sticky, it is pressure sensitive adhesive. In page-2, col. 1, lines 31-36, a textile structure is arranged on at least the top surface of the backing layer. The textile structure is a weave of intersecting thread, which would be forming a mesh arrangement. The reference also teaches a method of bonding a floor covering to a floor. However, Marchal fails to teach that the sheet is at least 350 mm wide. It would have been obvious to one having ordinary skill in the art to modify Marchal by providing said width of at least 350 mm, based on optimization through routine experimentation, as the reference also is directed to the same field as the instant application and coverage extent would be obvious optimization.

Art Unit: 1772

Similarly, the adhesive strengths would also have been obvious based on optimization through routine experimentation.

Further, the process conditions in the product claims have not been given patentable, as said conditions are not germane to the patentability of the product itself.

4. Claims 29 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marchal.

Marchal, as discussed above, discloses the claimed invention except for floor being parquet and the backing being polyethylene or polypropylene film. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide polyethylene or polypropylene film, or parquet floor, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

The use of a known material also would have been obvious in the absence of any criticality shown in the application.

5. Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Marchal.

Marchal, as discussed above, discloses the claimed invention except for a second textile structure. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide for the second textile structure for enhancing reinforcement to the sheet, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. St. Regis Paper Co. vs. Benis Co., 193 USPQ 8.

Art Unit: 1772

6. The substitute specification filed with amendment (Paper No. 8) on January 10, 2003 have been received and entered into the application.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication the examiner should be directed to Nasser Ahmad whose telephone number is (703) 308-4424. The examiner can generally be reached on Monday-Thursday from 7:30 a.m. to 5 p.m. and on alternate Fridays.
